CONSULTATION REQUEST

Patient Name: _____ Referring Doctor: _____

Address: _____ Address: _____

Phone No.: _____ Phone No.: _____

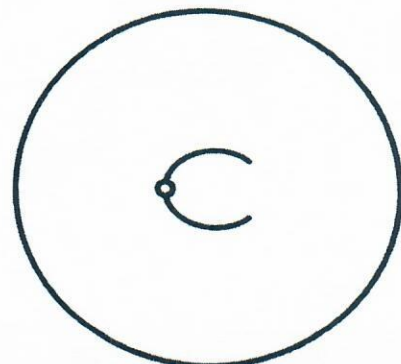

Reason for Referral:

Indicate Area(s) of Interest:

O.D.

O.S.

Will you be able to drive after your eyes are dilated?

Dilating your pupils with eye drops does cause temporary blurring of vision and increased light sensitivity. You may be more comfortable having someone accompany you to the office so that he or she can drive you home. The major effect of the eye drops generally wears off after 3 to 4 hours in most people.

Should you bring anything with you to your visit?

Please bring this form, your insurance cards, eyeglasses, a list of medication that you take (including eyedrops), and the name and address of your primary care doctor.

What types of insurance are accepted?

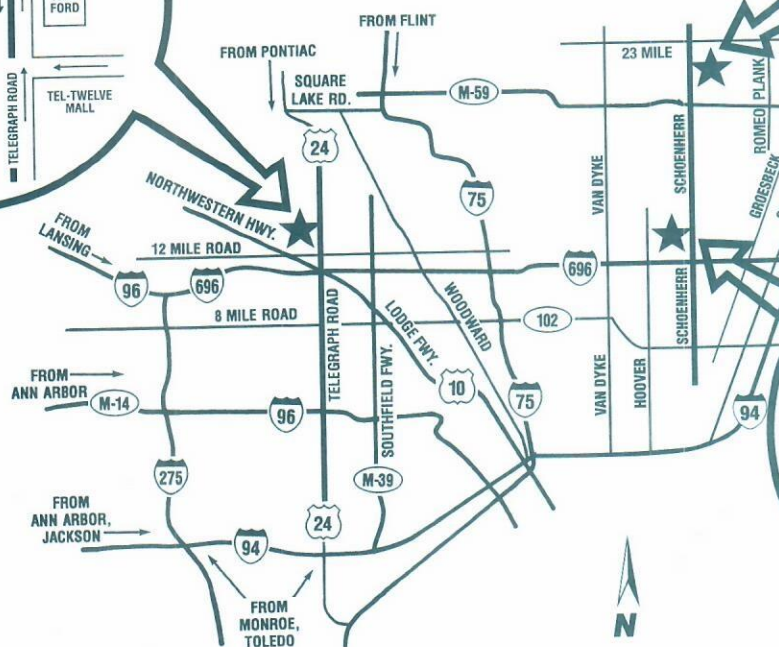

We participate in most medical insurance plans, including Medicare. If you have any questions concerning your coverage, please call prior to your appointment. If you belong to an HMO or managed care plan, please bring the appropriate authorization forms with you.
